Description

This awareness class was developed to provide a basic understanding of The Professional Practices for Business Continuity Management and their proper application within a business continuity program. It is intended for all personnel, organizations and groups that require a primer in business continuity and business resiliency as a professional discipline.

Objective

- Review The Professional Practices for Business Continuity Management body of knowledge designed to assist in the development, implementation, and maintenance of business continuity programs.
- Highlight the terms and methodologies presented in The International Glossary for Resilience and the Professional Practices.

NOTE: This course does not prepare students to take the Qualifying Exam or apply for certification at any level. It is neither a replacement for any courses in DRI's Continuity Track nor a line-by-line review of the Professional Practices. While there are no formal prerequisites, a base level of knowledge is preferred, and the Professional Practices should be read in advance.
