32 Continuing Education Activity Points (CEAPs) may be awarded towards recertification if applicable

Examination: Risk Management Examination

Cost: \$2,750.00

Description

Risk Management is a top priority in all sectors, from supply chain to cyber security. As a professional in this field, you have to be at the top of your game, to truly identify the threats your organization faces and how to protect against them. You need to be able to perform risk assessments, reduce organizational vulnerabilities, select cost effective risk controls, and obtain buy in from upper management. Risk Management Continuity (RMLE 2000) focuses on teaching those skills and many more. Developed and taught by experienced instructors, this course combines theory with real world practices to give you in depth instruction and tools you can put to use in creating a robust Risk Management program. The course is designed to give students the tools they need to pass the Risk Management Examination and continue on the path toward becoming a DRI Certified Risk Management Professional (CRMP) or Associate Risk Management Professional (ARMP).

Objectives

1. Provide students with detailed instruction and tools for implementing DRI business continuity management risk evaluation and control
2. Delineate the skills, knowledge and procedures business continuity professionals need to develop and manage a Business Continuity Risk Management program
3. Prepare to pass the Risk Management Continuity Examination with a minimum passing grade of 75%
